Whether it be the yellow-fever-smitten West Indies or African Coast the plague-visited portion of the Mediterranean, the cholera-scourged cantonnments of British India or the malaria-evolving soil of Southern China, the same inaptitude to profit by acquired experience is a constantly recurring event. There is scarcely

It would seem that competent authorities pronounce a peculiar malarial, which rises from the newly-turned earth of the island and mainland to be the generating source of the disease under which the troops are suffering.

probable plan, which presented itself for avoiding the recurrence of military mortality was to prohibit the occupation of buildings erected upon earth which had been recently disturbed. While however occurring in the probable safety of such a procedure, we cannot compliment the incognito which could discover no

Under present circumstances but little inconvenience may result from thus leaving the buildings to look after themselves, but did events require a large accession of military force in the colony the ingenious scheme adopted would somewhat interfere with the necessary arrangements. It reminds one so irre-

Nearly two years since, in alluding to the recent mortality of the troops, we adverted to the prevailing opinion respecting "ground malaria," and pointed out a simple and inexpensive way of meeting the danger by a surface dressing applied to the freshly turned up earth.

A letter which appeared in today's issue over the signature T. LOCAL.

We understand that it is the new project of the Company to open a branch line to their way to Chong-ching, and that consequently it is extremely unlikely they will be more than one performance here.

The Article on Manchuria, first column, is No. 2 of a series of the *North China Daily News*, but appeared in our issue of course without the acknowledgment or record. The remainder which are evidently written by an experienced authority, will in future numbers of the *China Mail* be reprinted in *Papers on China*.

Inspector Langdon, in charge of the Eastern Police District, charged a native crew (56) of the steamship "Hawke" to the Magistrate this morning, on charges of having stolen, or having been concerned in the theft of, a box containing \$4,000 worth of treasure, on the 10th December inst., while the ship was lying at Calcutta. Four of the crew were remanded and ordered to stand trial in G.W. at 10 o'clock. Captain Bolton, both expressing belief that evidence against the accused would be produced, proving their actual robbery, while the two prisoners, seamen and firemen, were remanded, and ordered to bail. The Police are busy on this important matter, and will, we are confident, be successful in obtaining a conviction.

TO-DAY'S POLICE.

Mr May had a considerable business at the Court this morning, a large proportion of the cases being of importance.

There would seem to have been a fight amongst the Jacks on Saturday. Two of the men belonging to the (French frigate) were charged, and assaulted the Police. Robert, a genuine, grey-haired old tar, with a witness-box, and having testified every way but the right one, said: "Yes, I'll tell you; I think main road there, the Queen's, the Queen's Road." The two men, and when I came up, the big fellow knocked me down with a brick, had no right to interfere enough. But I was knocked out.

R. Caldý, an inmate of the State Prison, was charged with the unlauful possession of a coat belonging to another inmate who was found in prisoner's lock-up. Mather, Prisoner said he had been talking about the world for eight years, and he would never get out of there; he had been drunk in
